

*Our 2010 conference will be held in John Muir's beloved 'Range of Light', the east side of the Sierra Nevada, at The Mountainside Conference Center, Mammoth Lakes. The location is truly one of the magical places on the planet and one which will form an amazing backdrop and context for our conference. The 'East Side', as many locals lovingly call it, has seen a great deal of environmental and social drama over the years.*

*One focus of the conference will be the work of the Mono Lake Committee with the Los Angeles Department of Water and Power, a compelling and encouraging story of finding common solutions. This uniquely beautiful venue will offer a wide range of things to do on both sides of the conference, so bring your family and/or friends and experience some of the recreational, educational and relaxational activities the East Side has to offer. We've listed a few helpful websites below. See you there!*

Michael Hogan, Integrated Environmental Restoration Services, Inc., SERCAL Region 8 (Sierra) Director
